

## SEL70200G

35mm full frame E-mount  
telephoto zoom lens FE 70-  
200mm F4 G OSS

### Overview

#### **Telephoto power meets G Series precision**

Shooting sports or wildlife, the SEL70200G comes into its own. Covering the 70–200mm range where much of the telephoto action occurs, it combines refined G Series optics with built-in image stabilisation. Dust and water resistant, it also features the Sony Nano AR Coating to minimise flare and ghosting.

#### **35mm full frame E-mount**

Coupled with a full frame E-mount camera from Sony, this lens delivers big camera performance in a remarkably compact, easy-to-handle package.

### Features

#### **See the difference with G Lens**

Renowned for their descriptive power, G Series lenses maintain excellent peripheral light characteristics and maximum contrast even at the edges of the frame.

#### **Smooth defocusing**

Instead of a standard polygon-shaped lens aperture, this lens features a 9-blade circular aperture for more natural, rounded defocusing or ‘bokeh’.

#### **Refined optical performance**

Precision optical technologies include Advanced Aspherical (AA) elements, Super ED (Extra-low Dispersion) glass elements, and the Sony Nano AR coating.

### **Fast, agile focusing**

An internal focusing mechanism means the lens barrel doesn't move, enabling a more compact design, faster autofocus response, and reduced minimum focusing distances.

### **Capture smooth, blur-free images**

Built-in Optical SteadyShot™ image stabilisation within the lens ensures smooth, blur-free photos and videos when shooting handheld.
