

V-160HD VERSION 2.0 UPDATE

The switcher that powers your productions taken to the next level at no additional cost

VERSION 2.0 NEW FEATURES

With the Version 2.0 update, the V-160HD continues to evolve with more video output formats, composition layers assignable to the Aux bus, macro recording enhancements, dissolve and PGM/PST (20) switching modes, and more.

KEY UPDATES

- New video output formats for expanded versatility, including 1080/23.98p, 1080/24p, 1080/25p, 1080/29.97p, and 1080/30p
- Assign composition layers to the Aux output in addition to the Program and Sub-Program outputs
- Interlaced or progressive signal types can now be independently set for each video output.
- Freely assign inputs and change their order in the input display to optimize your setup for different productions
- Select and mix any audio channel pair (1/2, 3/4, 5/6, 7/8) embedded in the HDMI and SDI inputs
- Record macros in real time with panel actions and edit them via menus in the LCD screen, RCS, or iPad remote app
- New dissolve switching mode and PGM/PST (20) switching modes
- Numerous operation enhancements throughout
