

4K/12G-SDI Compatible Compact Live Switcher

Worldwide Olympic Partner

Achieving 4K Video Production with a Compact, Versatile Switcher

This feature-rich, multi-format switcher for 4K and HD productions extends Panasonic's legacy of producing high-quality, reliable switchers.

With its compact, integrated body, this live switcher is equipped with many functions found in high end models and delivers 4K video production with the same operability as HD. In addition to fixed installations such as university lecture halls and corporate conference rooms, the AV-UHS500 is well suited for remote production. Designed for easy portability and simple set up it should become a favorite tool for staging and other event production.

- Versatile 12G-SDI/3G-SDI/HDMI interface support
- O UHD/HD multi-format support
- Expanded functions with two optional unit slots
- Standard number of inputs/ outputs: 8 inputs / 7 outputs, Maximum number of inputs/ outputs (with optional boards): Maximum 16 inputs / Maximum 15 outputs
- Up/down conversion function, HDR/SDR conversion function and ITU-R BT.2020/BT.709 conversion function; Scaler function; Color correction function support
- Four AUX buses AUX 1 and 2 have MIX transition functions, DSK 1 and 2 can also be assigned
- O Camera control for Panasonic Integrated PTZ Cameras
- O Five keyers for excellent image effects

Exceptional Support for Mixed 4K and HD Operation

12G-SDI/3G-SDI/HDMI Support

12G-SDI that can transmit 4K video with as single coaxial cable is supported as standard, and it provides easy setup and operation with high quality 4K video production. In addition, HDMI support allows direct input of data from a PC for live production such as during seminars and lectures without the need for a separate HDMI converter.

UHD/HD Multi-Format Support

Multiple 4K/3G/HD formats are supported, including 2160/59.94p and 1080/59.94p.

UHD/HD function comparison

	AV-UI	HS500
	4K (UHD) mode	2K (HD) mode
DVE	Option (AV-UHS5M5G)	Standard
Clip	1ch	2ch
Still	1ch	2ch

Frame Synchronizer for All Inputs

All input channels feature a built-in frame synchronizer. The Genlock function also supports synchronizing systems based on external sync signals (Black burst or Tri-level).

Eight Standard SDI Inputs, Two Standard HDMI Inputs*1 Five Standard SDI Outputs, Two Standard HDMI Outputs

The number of inputs and outputs during HD operation can be maintained in 4K. The number can also be increased if required through the use of two optional unit slots.

Number of	12G/3G-SDI	8 inputs, standard/16 inputs, maximum*2
inputs	HDMI	2 inputs, standard $^{\ast 1}$ / 8 inputs, maximum $^{\ast 2}$
Number of	12G/3G-SDI	5 outputs, standard/13 outputs, maximum*2
outputs	HDMI	2 outputs, standard*3/8 outputs, maximum*2

*1: SDI input is reduced by the number of HDMI input channels used.

HDMI input is not compatible with CPRM (input not possible).

*2: When the optional unit is installed. For details, see page 8

*3: The HDMI output format is the same as the system format only for video.

Various Built-in Conversion Functions, Including Up/Down Conversion

Various conversion functions are provided as standard. No external conversion box is required.

Various Image Effects Achieved with Enhanced Keyer and Memory Functions

Versatile Transitions and Effects

In addition to standard wipe, mix, and cut transitions, a variety of DVE transitions patterns using two channels, such as reduce, slide, squeeze and 3D wipe are available in HD mode. DVE transitions can also be used in 4K by adding a 4K DVE Unit AV-UHS5M5G.

Circle wipe

Page turn

Wipe, squeeze, slide, 3D wipe menu (in HD mode)

Five Keyers

A luminance key, linear key, chroma key, full key and PinP are provided for three channels, plus two channels of downstream key (DSK). Chroma keying employs the Primatte® algorithm, which is widely used as a plug-in for nonlinear editors. The same excellent Primatte® quality that is used worldwide for movies, TV programs, music videos and commercials is achieved by the live switcher's real time processing.

Video Memory

Two inputs in HD and one input in 4K for still (STILL) or video (CLIP) images can be saved and selected as bus footage. Moving images can be recorded and played back with key signals (with the 1080/59.94i format, approximately 120 seconds/3600 frames).

Four AUX Buses, DSK 1 and 2 Can Also Be Assigned

Two PinP buses and four AUX buses are provided. Borders and software effects can be applied to the PinP buses. In addition to cut transitions, the bus transition function (PinP and AUX buses transition effect) also enables mix transitions (AUX bus 1 and 2 only). Flexible support is achieved by combining AUX buses and M/E sections. DSK 1 and 2 can also be assigned to AUX 1 and 2.

Three independent outputs can be controlled

Various Memory Functions for Smooth Live Production

Shot memory

Up to 100 background transition patterns, PinP sizes, border widths and other video effects can be registered and recalled. Effect dissolve can be set to ensure smooth switching from the current image to the image or operation registered in the shot memory.

Event memory

Up to 64 image effects in sequence can be registered and played back on a timeline using the event memory function. This allows highly expressive consecutive effects to be easily and smoothly executed. Up to 100 event memories can be registered.

Macro memory

This function allows recording and playback of a series of operations on the Control Panel. It can also record and playback setting information, such as input/output and keyers, allowing video effects involving complicated operations to be executed easily. Macro memory playback is executed by assigning to the crosspoint buttons.

SDHC/SDXC* Memory Card Slot

Video memory, shot memory data, event memory data, and setup data can be saved using an SDHC/SDXC memory card.

* SDXC memory card support is planned with a firmware update in spring 2020.

PTZ Camera Control Function

The PTZ camera control function enables 4K/HD Integrated Cameras to be controlled from the AV-UHS500.

* See page 8 for supported 4K/HD Integrated Cameras.

PTZ camera control

• Number of cameras controlled: 8 cameras, standard / 16 cameras, maximum (with input from optional unit)

• Camera control: Pan, tilt, zoom, focus, iris, preset store, recall, scope, preset speed, AWB mode, AWB execution, paint, OSD menu

Two MultiViewer Functions

4K/HD Integrated Camera control menu screen

Two independent MultiViewer output functions are provided as standard, enabling the display of up to 16 split screens (a total of 10 patterns) on a single screen.

- MultiViewer layout can be selected from a total of 10 patterns, including four split, five split (two patterns), six split (two patterns), nine split, 10 split (two patterns), 12 split*, and 16 split.
- Source names, tallies, audio level meters, clock and safety markers can be displayed.
- Select between fit mode, in which the video image is the same size as the split frame, and squeeze mode, which places the source name and level meter outside the image.

* Does not operate at 720p.

Synchronous Terminal

REF Terminal Reference Input/ BB Outputs	In Genlock mode: Black burst or Tri-level Sync input signals (with loop-through) • Loop-through output is performed in external sync mode. • If loop-through output is not going to be used, provide a 75 Ω termination. • Connectors : BNC x 2 • Same field frequencies as those of the system formats supported. • With the 24.00p format, Black Burst input signal is not supported. • With the 1080/23.98PsF format, black burst with 10 Field ID (SMPTE318M standard met) or Trilevel Sync signals supported. • BB signals are output from two connectors in the internal sync mode.	
Video Delay Time	1 line (H)	When the frame synchronizer setting is [Off] and neither the up-converter nor the down-converter is operating
	1 frame (F)	When the frame synchronizer setting is [On] and the up-converter and downconverter are operating
	 When the signals have passed through PinP, DVE, multi view, down- converter or HDMI IN, a maximum delay of 1 frame is applied in each case. 	

Control Terminal LAN Terminal Compatible with 1000BASE-TX and AUTO-MDIX (For IP control) Connecting cable: LAN cable (CATSE), max. 100 m (328 ft), STP (Shielded Twisted Pair) cable recommended Connectors : RJ-45 TALLY GPI Terminal INPUT: 8 inputs general-purpose, photocoupler sensing OUTPUT: 19 outputs; selected from R/G tally, general-purpose ALARM: 1 output, open collector output (negative logic)

OPTION Unit

General

	AV-UHS5M1G	AV-UHS5M2G	AV-UHS5M3G	AV-UHS5M4G	AV-UHS5M5G
Power Supply	DC 12 V		Supplied by AV-UHS500		
Power Consumption	15 W 1.2 A		16 W 1.3 A		14 W 1.1 A
Ambient Operating Temperature	0°C to 40°C (32°F to 104°F)				
Ambient Operating Humidity	10% to 90% (no condensation)				
Storage Temperature	0°C to 40°C (32°F to 104°F)				
Storage Humidity	10% to 90% (no condensation)				
Weight	Approx. 371 g (Approx. 0.82 lbs.)			. 353 g 0.78 lbs.)	Approx. 354 g (Approx. 0.78 lbs.)
Dimensions (W x H x D)	(4-13/32 inches) 6-9/16	mm x 167 mm x 1-21/32 inches x inches) protrusions)			

SDI Input Unit AV-UHS5M1G

SDI IN 1 to SDI IN 4 Terminals	 Frame synd Up-conver Color space 	4 lines • Connectors: BNC x 4 • Frame synchronizer function • Up-converter fitted. • Color space conversion function • Color corrector fitted.	
	12G-SDI	12G Serial digital, SMPTE ST 2082-10 standard complied with • 0.8 V $[p-p] \pm 10\%$ (75 Ω) • Automatic equalizer 80 m (when the cable is used)	
	3G-SDI	 3G Serial digital, SMPTE292 standard complied with (Level-A/Level-B) 0.8 V [p-p] ± 10% (75 Ω) Automatic equalizer 100 m (when the cable is used) 	
	HD-SDI	HD Serial digital, SMPTE292M standard complied with • 0.8 V [p-p] ± 10% (75 Ω) • Automatic equalizer 100 m (when the cable is used)	

SDI Output Unit AV-UHS5M2G

4 lines • Connectors: BNC x 4 • Down-converter • Color space conversion function • PGM, PVW, CLN, ME PGM, MV1 to MV2, AUX1 to AUX4, Key Out can be assigned.		
12G-SDI	12G Serial digital, SMPTE ST 2082-10 standard complied with 0.8 V [p-p] \pm 10% (75 $\Omega)$	
3G-SDI	3G Serial digital, SMPTE292 standard complied with (Level-A) 0.8 V [p-p] \pm 10% (75 $\Omega)$	
HD-SDI	HD Serial digital, SMPTE292M standard complied with 0.8 V [p-p] \pm 10% (75 $\Omega)$	
	Connectors: Down-convi Color space PGM, PVW, Cl 12G-SDI 3G-SDI	

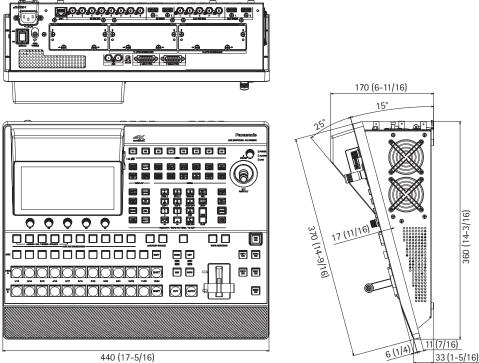

HDMI Input Unit AV-UHS5M3G

HDMI IN 1 to	3 lines
HDMI IN 3	Video format inputs: 720p/59.94 Hz, 720p/50 Hz, 1080i/59.94 Hz,
HDMI IN 3 Terminals	Video format inputs: 720p/59.94 Hz, 720p/50 Hz, 1080i/59.94 Hz, 1080i/50 Hz, 1080p/59.94 Hz, 1080p/50 Hz, 1080p/29.97 Hz, 1080p/25 Hz, 1080p/24 Hz, 1080p/23.98 Hz, 2160p/59.94 Hz, 2160p/50 Hz, 2160p/29.97 Hz, 2160p/25 Hz, 2160p/24 Hz, 2160p/23.98 Hz PC format inputs: 4K (3840 x 2160, 60 Hz), WQHD (2560 x 1440, 60 Hz), WUKGA (1920 x 1200, 60 Hz), UXGA (1680 x 1200, 60 Hz), WXGA+ (1680 x 1050, 60 Hz), XXGA (1280 x 1024, 60 Hz), WXGA+ (1280 x 768, 60 Hz), XGGA (1024 x 768, 60 Hz) Mode: Full/Fit-H/Fit-V • Connectors: HDMI x 3 • Frame synchronizer function • Color corrector fitted.
	• This connector does not support the CPRM technologies.
	This connector does not support the er nivi teemologies.

HDMI Output Unit AV-UHS5M4G

HDMI OUT 1 to	3 lines
HDMI OUT 3	Mode: Fit-V, Fit-H, Full, Full-90%, Full-80%
Terminals	Size: Auto, WQHD (2560 x 1440, 60 Hz), WUXGA (1920 x 1200, 60 Hz),
	UXGA (1680 x 1200, 60 Hz), WSXGA+ (1680 x 1050, 60 Hz), SXGA (1280 x 1024, 60 Hz),
	WXGA (1280 x 768, 60 Hz), XGA (1024 x 768, 60 Hz), Native
	Color: Auto, RGB, YUV444, YUV422
	Connectors: HDMI x 3
	• PGM, PVW, CLN, ME PGM, MV1 to MV2, AUX1 to AUX4, Key Out can be assigned.
	 Scaler and Color space conversion function

*1: Support is planned with a firmware update in spring 2020.
