HERO 13 BLACK CREATOR EDITION

The HERO13 Black Creator Edition is an all-in-one content capturing powerhouse that makes vlogging, filmmaking and live streaming easier than ever. This complete system features pro-quality 5.3K60 video with HDR, Emmy® Award-winning HyperSmooth 6.0 video stabilization, over 5 hours of 4K recording time per charge,¹ enhanced audio with the option to add an external mic and powerful LED lighting. It's also compatible with the HB-Series Lenses² that let you expand your capture capabilities to include ultra-wide shots, pro-quality anamorphic footage, closer-than-ever shots and motion blur effects using neutral density filters.

What's Included

- 5.3K60 + 4K120
2.7K240 Video
- 13x
Burst Slo-Mo at
720p400 + 8x Slo-Mo
- HDR
HLG HDR Video
- Lens Mod
Auto-Detection
- Time Lapse With
TimeWarp 3.0
- 5+ Hours of
4K Recording
- 10-Bit Color
- Enhanced Audio
- Grip Doubles as a
Bluetooth Remote
- 27MP Photo
- SuperPhoto + HDR +
RAW Photos
- Waterproof 33ft (10m)
(Camera Only³)

HYPERSMOOTH | **6.0**

Key Camera Specs

VIDEO

- 5.3K60, 4K120, 2.7K240 and more / 8x Slo-Mo / 24.7MP frame grabs

PHOTO

- 27MP Single Photo / Interval Photo / Night Photo / 30 fps Burst / RAW

BURST SLO-MO

- 720p400 / 900p360 / 5.3K120

TIME LAPSE

- 5.3K TimeWarp 3.0 Video / Star Trails / Light Painting / Vehicle Light Trails / 5.3K Time Lapse Video / Time Lapse Photo / 5.3K Night Lapse Video / Night Lapse Photo

Supporting Features

VIDEO

- 5.3K60/50, 4K120/100, 2.7K240/200, 1080p240/200 resolution/fps³
- 16:9, 9:16, 4:3, 8:7 aspect ratios
- Up to 8x Slo-Mo
- HDR + HLG HDR
- HyperSmooth 6.0 video stabilization with AutoBoost
- Horizon Lock / Horizon Leveling⁴
- 8-bit, 10-bit + Log encoding
- H.265 (HEVC) MP4 video format
- Looping video
- Webcam mode
- Live streaming in 1080p
- Frame grab with the GoPro Quik app
- Digital lenses
- 2x zoom
- HindSight
- QuikCapture
- Protune

BURST SLO-MO

- 13x slo-mo 720p video for 15 seconds
- 12x slo-mo 900p video for 15 seconds
- 4x slo-mo 5.3K video for 5 seconds

PHOTO

- 27MP photos
- SuperPhoto, HDR + RAW
- Star Trails, Light Painting + Vehicle Light Trails effects
- Interval Photo
- Night Photo
- Digital lenses
- 2x zoom
- RAW photos
- Protune

TIME LAPSE

- 5.3K TimeWarp 3.0
- Time Lapse photo (27MP) + video (5.3K)
- Star Trails, Light Painting + Vehicle Light Trails effects
- Night Lapse photo (27MP) + video (5.3K)
- Digital lenses
- 2x zoom
- Protune

CAMERA CONTROL

- Large 2.27" rear touch screen
- 1.4" front screen for preview or status
- Easy + Pro Controls
- GPS with data overlays
- Custom presets
- Customizable onscreen shortcuts
- Scheduled + Duration Capture
- HiLight Tag
- Voice control with 13 commands in 11 languages + 6 accents

CONTENT OFFLOAD

- Auto-upload to the cloud + get a highlight video automatically⁵
- Wireless transfer to the GoPro Quik app
- Ultra fast wired transfer to your phone⁶
- SD card transfer to a computer

AUDIO FEATURES

- Stereo + RAW audio
- 3.5mm mic port for use with external microphone
- 3 microphones with advanced wind-noise reduction
- Directional microphone with foam mic cover
- Bluetooth® Audio for wireless connectivity

GRIP FEATURES

- Built-in battery boosts runtime to over 5 hours of 4K recording¹
- Fold-out tripod legs
- Built-in camera controls
- Can be used as a wireless camera remote
- Retractable mounting fingers
- 1/4-20 standard accessory mount

EXPANDABILITY

- Bluetooth® audio
- 3.5mm mic port
- HDMI port
- 2 cold shoe mounts

LIGHTING FEATURES

- LED lighting up to 200 lumens
- 4 levels of brightness
- Overdrive + strobe modes

Features + Benefits

All-in-One Creative Solution

The HERO13 Black Creator Edition combines our best camera with the pro-grade mounts and accessories you need to tell your story right out of the box. It includes the Volta (Battery Grip / Tripod / Remote), Media Mod and Light Mod that seamlessly come together in a lightweight design that's comfortable enough to carry through an all-day production.

Best-in-Class 5.3K Video

5.3K video delivers breathtaking image quality with 91% more resolution than 4K and an incredible 665% more than 1080p. The HERO13 Black Creator Edition captures the action with crisp detail and exacting image quality so any shot with any lens will look amazing. 5.3K video also lets you grab stunning photos up to 24.7MP from your footage using the GoPro Quik app.

Burst Slo-Mo

HERO13 Black features our slowest slo-mo ever with the ability to record video clips with the action slowed down to 13x normal speed. You'll also be able to record short 4x slo-mo clips using our highest 5.3K resolution video to catch epic details that you'd never be able to see with the naked eye.

Award-Winning HyperSmooth 6.0 Stabilization

HyperSmooth 6.0 continues to set the bar for in-camera video stabilization—giving you impossibly smooth footage no matter how rough it gets. HyperSmooth AutoBoost ensures that you're getting the widest stabilized footage possible by seamlessly adjusting the shot based on your speed and movement.

Built-In 360° Horizon Lock

The Linear + Horizon Lock digital lens keeps the horizon steady, straight and smooth even if your camera rotates a full 360° during capture.⁴ Combined with HyperSmooth video stabilization, Horizon Lock gives your footage the super smooth look of professional productions.

All-Day Capture + Upgraded Enduro Battery

The HERO13 Black Creator Edition combines HERO13 Black's Enduro battery with the power of the Volta grip to give you a total of 6800mAh of power. That's over 5 hours of continuous 4K recording or over 4.5 hours of 5.3K30 recording¹ (our highest resolution)—enough to capture a full day of video clips. The upgraded Enduro also dramatically improves cold weather performance so you can power through ski, snowboard and other winter shots.

1-Handed Control + Remote

Integrated camera buttons on the grip give you easy one-handed control of your camera: power on and off, start and stop capture, and switching modes. You can even detach the camera from the grip and use the grip as a wireless remote to control your camera from up to 98ft (30m) away.⁷

Easily Expandable

The Media Mod gives you the option of expanding your HERO13 Black Creator Edition with additional gear to help you capture your story. It features a standard 3.5mm mic port for adding your own external mic and HDMI-out for playback on external monitors, plus two cold-shoe mounts for lights, LCD screens or other accessories.

Powerful LED Lighting

The HERO13 Black Creator Edition's Light Mod lets you brighten the action and illuminate your next adventure with wide, even light. It features four levels of brightness (up to 200 lumens) plus Overdrive and strobe modes, and also works as a handy standalone light that can be used with GoPro mounts.

Built-In Tripod

In addition to making it easy to hold and aim your camera, the HERO13 Black Creator Edition's Volta grip has built-in tripod legs that easily flip out any time you need to set it down to capture stationary and hands-free shots. Swivel mounting fingers even let you rotate and tilt the camera to find just the right capture angle.

Mounting Flexibility

The included Magnetic Latch Mount makes it faster and easier to attach and detach your GoPro from the Volta grip. Magnets guide your camera into position so all you have to do is snap it in place. This is especially convenient when you want to switch your camera to another mount. The grip's retractable mounting fingers make it easy to attach your Creator Edition to GoPro backpack straps to capture a first-person view of your journeys. It can also be used with other GoPro mounts and includes 1/4-20 mounting threads for use with tripods and other standard camera accessories.

HLG-HDR Video

HERO13 Black takes its best-in-class image quality to the next level with the option to record in Hybrid Log Gamma (HLG), a standard HDR format that the pros use to capture 5.3K and 4K video in the 10-bit and Rec. 2100 color space. This advanced feature requires a compatible display and media player for playback. Users can still capture video using HDR without HLG for viewing on standard displays and media players.

Widescreen, Vertical + Full Screen Capture

The HERO13 Black Creator Edition's powerful 1/1.9" image sensor lets you do more. Choose widescreen capture (16:9 aspect ratio) for full-screen playback on a TV or vertical videos (9:16 aspect ratio) for social media posting. For maximum versatility, the full-frame option (8:7 aspect ratio) captures a 156° field of view that lets you crop in to create widescreen and vertical shots later.

Features + Benefits

10-Bit Color + Log Encoding

The HERO13 Black Creator Edition lets you choose between capturing standard video at 10-bit or Log encoding at 10-bit with GP-Log. Capable of displaying over 1 billion colors, 10-bit color delivers enhanced color depth, smoother gradations and more realism in your videos. Advanced users can use GP-Log to get more detail in their footage while making necessary image corrections in post-production (a lookup table/LUT is provided).

Timecode Sync

Advanced users with more than one GoPro can sync them with the exact same timecode to make multi-camera editing a lot easier. It works with Final Cut Pro®, Adobe® Premiere® and other editing software to further streamline post-production.

27MP Photos + 24.7MP Frame Grabs

The HERO13 Black Creator Edition takes 27MP Single, Interval, Burst and Night photos that let you capture standard, fast-action and low-light shots with the press of the shutter button. You can also grab stunning photos up to 24.7MP of your favorite shots from your videos using the GoPro Quik app.

Bluetooth® Audio Connectivity

Bluetooth® audio lets you wirelessly connect to compatible devices. Use a wireless microphone for enhanced audio when narrating a scene or conducting interviews. By connecting to your wireless earbuds, your GoPro will be able to hear your voice commands in noisy settings or when it's mounted out of earshot. You'll also be able to hear camera alerts through your earbuds to confirm that it got the command and is doing what you want.

Enhanced Audio Capture

The HERO13 Black Creator Edition's Media Mod features a standard 3.5mm mic port that lets you plug in a wired mic. It also has a built-in directional mic for improved voice recording. Set the mic to prioritize audio coming from in front of the camera to capture interviews and performances, behind the camera to add your commentary to everything happening in front of you, or set it to treat front and rear audio equally. It also includes a removable foam mic cover that suppresses wind gusts up to 20 mph (32 kph).

Audio Tuning

Audio Tuning lets you adjust sound recording to better fit what you're capturing. Choose balanced true-to-life sound that's great for most shots or the Voice setting that enhances vocal clarity while also preserving ambient background sounds.

Quicker QuikCapture

QuikCapture is the fastest and easiest way to power up and start recording. All it takes is a press of the shutter button. Now you can also set your camera to idle without completely powering down. This lets you start recording again even faster. It's the perfect way to stay flexible and ready to record during active shoots.

GPS + Performance Stickers

GPS automatically captures telemetry data that can be overlaid as animated graphics in your video using the GoPro Quik app. It's a visual way to show off your speed, path, terrain, altitude and g-forces while giving your videos an intense professional vibe.

Front + Rear LCD Screens

Frame your shots perfectly with either the front or rear LCD screen. Use the large rear touch screen to capture the scene in front of you, or turn your camera around and use the front screen for vlogging and perfectly framed selfies.

More Preset Options

Create presets of your go-to settings—resolutions, frame rates, lenses and more—for all of your favorite activities and conveniently switch them up in just a few taps. You can personalize them with custom names right on the camera or with the GoPro Quik app.

Highlight Videos Automatically Sent to Your Phone⁵

Simply plug in your GoPro when connected to your home Wi-Fi. While it's charging, your footage is automatically uploaded to the cloud and used to make a highlight video complete with beat-synced music and effects. Videos are automatically sent to your phone and ready to share.

Easy Editing With the GoPro Quik App

The GoPro Quik app is loaded with easy-to-use tools that let you edit your footage like a pro. You can tweak the automatic highlight videos created by the app or make your own videos from scratch. You also have the flexibility to change digital lenses after recording and zoom in on the best sections of your footage to create high-resolution punchouts that focus on the action while cropping out the rest.

Faster Transferring + Unlimited Cloud Backup⁵

Transferring content from your camera to your phone is simpler and faster than ever. HERO13 Black uses the Wi-Fi 6 technology for faster, more reliable offloads to your phone and the cloud. You can also choose a lightning-fast wired connection via USB⁶ or use your SD card to transfer your content to a computer. There's also unlimited cloud storage with hassle-free auto-upload.⁵ Just plug in your camera when connected to your home Wi-Fi and the camera does the rest.

Night Effects Video + Photos

HERO13 Black features 3 time lapse and photo modes that let you get creative after dark. Star Trails uses the Earth's rotation and stars to capture beautiful light trails across the night sky. Light Painting lets you create brilliant brush stroke effects with moving light. Vehicle Light Trails uses night-time traffic to record stunning light trail shots.

Features + Benefits

Power Tools

Nail any shot with in-camera Power Tools. HindSight captures up to 30 seconds of footage before you start recording—even if you press the shutter too late, you'll still get the shot. With Scheduled Capture, you can set your GoPro to turn itself on and get a shot up to 24 hours in advance. Duration Capture makes it easy to capture video clips from 15 seconds to 3 hours long. Interval Photo snaps photos at fixed intervals while you stay focused on your favorite activities.

Easy or Pro Controls

Choose point-and-shoot simplicity or full camera control. With Easy Controls, just frame your shot and hit the shutter button for amazing results. The Pro Controls unlock the ability to fine-tune all modes, settings and features.

Built Around the Durable + Waterproof HERO13 Black

At the core of the HERO13 Black Creator Edition is HERO13 Black—the world's most versatile camera. Used on its own, HERO13 Black gives you amazing image quality, plus the legendary toughness that can take a beating whether you're ripping through mud, snow or water (to depths of 33ft/10m).⁷ You can also use HERO13 Black with GoPro mounts to capture unique-one-of-a-kind perspectives and a huge variety of body-, helmet- and gear-mounted shots.

Compatible With HB-Series Lenses²

HB-Series Lenses let you swap out the standard lens that came with your camera to capture a wide variety of specialty shots. The Ultra Wide Lens Mod is the ultimate POV lens for action-packed scenes and epic landscapes. The Macro Lens Mod captures close-up shots in stunning detail. Neutral Density Filters let you control the lighting in your shots with professional results. Try the Anamorphic Lens Mod for pro-level cinematic shots. Your GoPro even detects when a lens or filter is attached and automatically adjusts its settings accordingly.

Webcam + Live Streaming

Use the Creator Edition as an ultra versatile webcam, or live stream your next activity as you vlog with buttery HyperSmooth video stabilization and sharp resolution.

¹Runtime measured at a temperature of 77°F (25°C) with a wind speed of 0.6m/sec with the Wide digital lens; wireless connections, Bluetooth® and HyperSmooth on; front and rear LCD screens on with a 1-minute screensaver; voice control and GPS off.

²Sold separately.

³Frame rate is listed in 60Hz (NTSC) and 50Hz (PAL) video format, which depends on your region.

⁴Horizon Lock is unavailable when recording 5.3K60, 4K120, 2.7K240 and 1080p240 video. Horizon Leveling will be used for these high-performance settings.

⁵Within your home Wi-Fi network. GoPro subscription required. GoPro subscription available in select territories. Cancel anytime. Visit gopro.com for info and availability. Cloud upload and automatic highlight videos are not available in China.

⁶Requires standard USB-C to USB-C or standard USB-A to USB-C and Apple® Lightning to USB Camera Adapter, depending on device.

⁷Range may be affected when recording with higher resolutions and frame rates and other high-performance settings.

WARNING: HERO13 Black Creator Edition (HERO13 Black camera when used with Volta, Media Mod and Light Mod) is not weather resistant or waterproof. Using the complete system in rain, snow or under water will damage your camera and void the warranty.
