ZHIYUN

B100-B500

Output Power

100-500_w

- Integrated the power source directly into the light, no need for external power supplies
- Can work with just one AC cable, combining light control and power into one to be more lightweight
- Lightweight, user-friendly and professional for different scenarios in large indoor scenes and small studios

Portable and Pro Lights From 100W to 500W

In ZHIYUN, we're introducing a range of film and studio lights that are easy to use and set up, with power ranging from 100W to 500W. They are for scenarios and are compatible with all Bowens mount accessories.

Multiple Modifiers For Different Scenarios

- Portraits
- Livestreaming
- Interviews
- Commercials

ZHIYUN B-series COB lights deliver pro-level light shaping and control to easily fit various lighting scenarios, fully bringing out texture and dimension whether shooting portraits, live streaming, interviews, or commercials.

Multiple Modifiers For Different Scenarios

Lantern Softbox

Octagonal Softbox

Parabolic Softbox

Rectangular Softbox

Bigger softbox sizes allow light to diffuse more for natural softness. We offer custom 600mm and 900mm parabolic softboxes, and 650mm and 850mm lantern softboxes, all with industry standard Bowens mounts along with grids, barn doors etc.

ZHIYUN softboxes use high-density reflective fabric with a crosshatch texture to optimize diffuse reflection, resulting in a more uniform and softer light that is less prone to light spots, ensuring superior quality.
