24. Reflector

NANLUX
Evoke 1200

Detailed Description

1. Quick release device: For quick installation and detachment of yoke.

2. NL mount: For installation of reflector or other NL mount accessories.

3. Lock catch: To lock or release the reflector or other accessories.

4. Eye Bolt: For hanging safety rope.

5. Yoke: Mount the fixture on a stand, pan and tilt.

6. Display: To display data.

7. Functions keys: Including DAYLIGHT, EFFECT, MENU and LOCK.

8. Left knob: For adjusting brightness and other parameters.

9. USB port: For updating firmwares or connecting USB cable to external devices with maximum current of 5V/1A.

10. DMX IN: DMX signal input interface.

11. Fixture body handle: Adjust the direction of the fixture.

12. Kipp handle: Tighten or release the tilt movement of the fixture on the yoke.

13. Right knob: For selecting options.

14. Wire control socket: Wire control Interface.

15. DC IN: DC power input interface.

16. DMX OUT: DMX signal output interface.

17. Power supply hanging point: For safely hanging the power supply.

18. DC power output socket: For connecting the fixture to the power supply with DC cable.

19. LED indicator: For determining the status of power input. Being on, power supply normal; Flashing or being off, power supply abnormal or no power input.

20. Power switch: To turn on/off the fixture.

21. AC power input socket: For connecting AC power supply.

22. Power supply handle: For lifting the power supply.

23. COB protective cap: When not using the fixture, cover with the cap for protection.
   (Note: Take off the cap before using.)

24. Reflector: For concentrating light to improve central illumination.

Usage

1. Connection between the Light Fixture and Power Supply
▲Note:

①When connecting the power supply, please make sure the power, voltage and frequency are consistent with the provided power supply

②Make sure to use the provided power supply and power cable. The connection between the DC plug and the DC IN power input socket on the fixture should be connected as following.

Pin3

Pin1+   Pin2-

Pin3

Pin2-   Pin1+
Pin1+: Connect with power supply +

Pin2-: Connect with power supply -

Pin3: Grounding wire

2. Installation and Detachment of Yoke

①Quick release yoke diagram

Quick release plate

Quick release plate mount
Quick release lever lock catch
Quick release lever
The side with kipp handle

The side with damping
②Installation of Yoke (Method One)

Lay the light fixture, bottom up, on flat ground.

Press the quick release lever lock catch to release it. Pull the quick release lever.

Align and insert the quick release plates to both mounts of the light fixture.
(Note: When installing the quick release plate, please adjust the plate to right directions, then insert them into the mount.)

Firmly holding the yoke in place with one hand, pull the quick release lever with the other hand to lock the plate.
Mount the yoke on heavy-duty light stand. Secure the fixture by locking the fastening screws on the stand.
When removing the yoke, remove the fixture from the heavy-duty light stand first and lay it down on flat ground.
Press the quick release lever lock catch of the fixture on both sides, then release the quick release lever to remove the fixture.

③Installation of Yoke (Method Two)

Mount the yoke on heavy-duty light stand. Secure the fixture by locking the fastening screws on the stand.
Press the quick release lever lock catch, pull the quick release lever, align and insert the quick-release plate mounts to the plates of the yoke.
Pull quick release lever lock catch on both side of the fixture to lock the plates in place. Installation of the yoke is complete.
3. Installation and Detachment of Reflector
When installing the reflector, align the reflector's bayonet lock to the light's mount, rotate the reflector clockwise and fasten the reflector on the light.
(Note: if the rotation is not smooth, pull the lock catch of the mount and rotate the reflector at the same time.)
When removing the reflector, pull the lock catch of the mount, rotate the reflector anticlockwise and remove.

4. AS-CP-QR-EV Evoke Quick Release Clamp Installation
①Loosen the kipp handle to open the clamp.
②Mount the quick release clamp on the light stand, then rotate the kipp handle to tighten the clamp.
③Align the quick release plate on the power supply with the quick release mount on the clamp to mount the control unit on to the clamp.
④When removing the power supply, press the lock catch on the clamp and release the power supply from the clamp.

Remote Control

. Evoke 1200 supports remote control via DMX, 2.4G, RDM and LUMENRADIO, and has built-in Bluetooth.

▲ The ADDRESS needs to be set before operating the remote control via DMX, 2.4G, RDM and LUMENRADIO.

1. ADDRESS/DMX, including ADDRESS, DMX MODE and DMX DIMMING CURVE settings.

①ADDRESS

Press MENU key to access options.

NC

DMX OUT

NC
NC
1 GND
2 DATA-
3 DATA+

· The connection between the light fixture and DMX/RDM console, light fixture and light fixture should use five core shielded cable. Make sure its diameter is not less than 0.3mm. XLR plug/socket and the wire should be connected as pictured.

· Pin1, Pin2, Pin3 for connecting DMX signal. Pin4, Pin5 has no connection.

▲NOTE: When connecting DMX, make sure the internal pin is not in contact with the inner case. The fixture can match the DMX512 (1990) control signal.

· Plug of five-core and three-core XLR plug/socket conversion.

  The fixture is supplied with five-core XLR plug. If using a three-core XLR plug, please follow the instructions below.
Five Pin	Three Pin
Pin 1:GND(SCREEN) Pin 2:Signal(-) Pin 3:Signal(+) Pin 4:N/C Pin 5:N/C	Pin 1:GND(SCREEN) Pin 2:Signal(-) Pin 3:Signal(+)

②DMX Terminator

  In DMX control mode, the DMX output of the last fixture should be connected with a DMX terminator (Not included). This prevents interference caused by DMX signals in the transmitting process. The terminator is connected with a 120Ω(OHM) resistor across Pin 2 and Pin 3. (As shown below)

5 1
2
4
120Ω
3

DMX Terminator Connection
Connect a 120Ω(OHM) resistor
across Pin 2 and Pin 3 in an
XLR plug and insert into the
DMX OUT socket on the last unit.

PIN 2   PIN 3
③Set the address of the fixtutre.

④Refer to the attached DMX reference guide and control the light via DMX/RDM console.

  (For specific operation methods, please refer to the DMX/RDM console operation manual.)

  Note: DMX reference guide 《Evoke 1200 DMX REFERENCE GUIDE》 please download it from www.nanlux.com.

3. 2.4G Remote Control

· Set the address of the 2.4G remote controller to be consistent with the light fixture, enabling the Evoke 1200 to be remotely controlled by 2.4G remote controller or by APP via the transmitter box.

Note: ①2.4G remote controller and transmitter box are sold separately.

②The fixture supports the 2.4G wireless protocol V1.0 and V2.0. Set fixture to V2.0 while using WS-RC-C1 or WS-RC-C2 remote controller. Set fixture to V1.0 while using other remote controllers.
Rotate "Right knob" to WIRELESS PROTOCOL, press "Right knob" to enter the corresponding sencondary menu.
Rotate "Right knob" to select V1.0 or V2.0, press "Right knob" to set.

4. RDM Remote Control

①Connect the light fixture to the console with RDM function using a connection cable, the connection method is the same as with a DMX/RDM console.

②Control the fixture via a console with RDM function. (For specific operation methods, please refer to the RDM console operation manual.)

Note: The UID format of the fixture is as follows:

```
0008            XXXX            XXXX
```

Serial number

0501：Evoke 1200

Manufacturer: Nanguang
5. LUMENRADIO Remote Control

· Evoke 1200 has built-in CRMX TIMO TWO module, enabling it to receive CRMX wireless DMX signals. The Specific operation is as follows:

① RECEIVER MODE

(1) RECEIVER MODE setting

Press the MENU key to access options.

NO YES	
PRESS "MENU" TO RETURN	🔓🌀 ON

MENU	CH: 512
SET	
PRESS "MENU" TO RETURN	🔓🌀 ON

Rotate "Right knob" to select "YES". Press "Right knob" to set.

(3) Please refer to P24 of the manual or CRMX wireless DMX transmitter manual to connect the fixture or CRMX wireless DMX transmitter set to TRANSMITTER MODE with the fixture set to RECEIVER MODE, the fixture can receive CRMX wireless DMX signals for remote control.

Note: · CRMX wireless DMX transmitter is sold separately.
　　　　· In RECEIVER MODE, the LUMENRADIO SETTINGS should be set to UNLINK to allow it to be reconnected to new fixtures or transmitters.

②TRANSMITTER MODE

(1) Set the RADIO MODE to TRANSMITTER MODE and connect with the DMX/RDM console.

Rotate "Right knob" to RADIO MODE. Press "Right knob" to enter next menu.
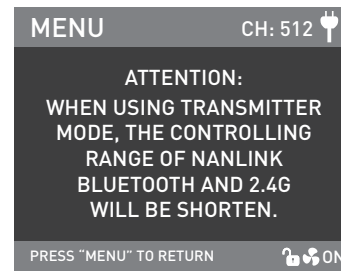

Rotate "Right knob" to select TRANSMITTER MODE. Press "Right knob" to set.

(2) The fixture can set the RF OUTPUT POWER when in TRANSMITTER MODE. The setting methods is as follows:

MENU	CH: 512 🔌
RADIO MODE	
RF OUTPUT POWER	
LINK	
PRESS "MENU" TO RETURN	🔒♻ ON

MENU	CH: 512 🔌
20dBm	
16dBm

5dBm	
PRESS "MENU" TO RETURN	🔒♻ ON
Rotate "Right knob" to OUTPUT POWER. Press "Right knob" to enter the next menu.

MENU	CH: 512 🔌
20dBm	
16dBm	
11dBm	
5dBm	
PRESS "MENU" TO RETURN	🔒♻ ON

MENU	CH: 512 🔌
SET	
PRESS "MENU" TO RETURN	🔒♻ ON

Rotate "Right knob" to select the desired RF OUTPUT POWER. Press "Right knob" to set.

(3) Set other fixtures that need to receive CRMX wireless DMX signals to RECEIVER MODE and set to UNLINK. (For setting method, please refer to P19.)

(4) Connect the fixture set in TRANSMITTER MODE with the fixture set in RECEIVER MODE.

When in TRANSMITTER MODE, the signal from the DMX/RDM console or DMX-based APP will be sent to the fixtures set to RECEIVER MODE.

The fixtures set to RECEIVER MODE should be set as follows:
Rotate "Right knob" to LINK. Press "Right knob" to enter the next menu.

Rotate "Right knob" to select LINK. Press "Right knob" to set.

(5) UNLINK Setting

When the fixture needs to stop transmitting the CRMX wireless DMX signal, set the fixture to UNLINK. The setting method is the same as the UNLINK setting on P23.

█ Operating Instructions

1. First, be sure that the power switch of the control unit is in the "off " position. Now it is safe to connect the power supply and power the unit on. If the power indicator is on that means the power supply is normal, the screen will display "NANLUX".

Mode ──── **DAYLIGHT**   CH: 512 ──── Powered by power supply

5. When the fixture is not in use, please turn off the power switch.

▌Safety Precautions

1. Please open the package to check for possible damage. If damaged, do not use. Please contact your distributor or the manufacturer as soon as possible.
2. Please do not use power cable which are faulty or have insulation damage. Please be careful when unplugging and do not drag the power cable.
3. Before installation, please make sure the power supply voltage is correct and compatible with that specified on fixture.
4. Please turn off the power when fixture is not in use or being cleaned.
5. Please operate the fixture safely. Keep fixture away from children.
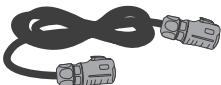

▌Notice

1. When the fixture is turned on, do not look directly at the emitter.
2. Please do not leave flammable or explosive articles within 0.5m of the fixture.
3. Weather resistance lamps refers to rainproof or anti-spraying, NOT submersible or underwater use. Please do not submerse the lamp in water. If you find damage on the lamp or cable, please do not put the lamp and cable close to or contact with water.
4. Avoid placing lamps near flammable and volatile substances, such as alcohol or gasoline.
5. When cleaning the fixture, please use soft cloth with neutral detergent to wipe off dirt. Please do not use abrasives or strong detergent.
6. As accessories such as lenses and softboxes are heavy, please hold the handle securely when detaching or adjusting beam directions.
7. During use, do not cover, restrict or obstruct ventilation holes, so as not to affect the heat dissipation and cause damage to the fixture. Please take care when using the lamp for long periods, as the surface temperature can be high.
8. Please do not disassemble the fixture or attempt to carry out repairs. Any required maintenance shiould be carried out by suitably qualified professionals, operating in strict compliance with the instructions described in this manual.

▌General Fault Detection and Diagnosis

Fault Detection	Diagnosis
The light won't boot up properly	1. Please check that the power supply, cable and outlet are properly connected and that the cable is not faulty or loose. 2. Please check wether the voltage value is within the specified parameters.
The fixture can be operated manually, but DMX control is not working.	1. Please check whether the DMX original address setting of the fixture is correct. 2. Please check that the XLR signal cable is connected correctly and that it is not faulty or damaged.
LCD display is on, but light cannot be operated.	Please check if the LCD display shows " 🔒 ". Press and hold the "LOCK" key for 2s to release the LOCK.
The fan doesn't work	1. Please check if the fan is OFF 2. If the screen dispays "Fan abnormal", please contact place of purchase.
The signal reception distance of 2.4 and Bluetooth is less than 5 meters.	Check whether the LUMENRADIO is in TRANSMITTER MODE, if it is, please disconnect the LUMENRADIO and set it in RECEIVER MODE.
